

Communications Your Way from **Avaya Cloud IP Office**

Are you looking for ways to improve employee productivity and increase customer satisfaction while still keeping costs in line? **Avaya Cloud IP Office** from **Bishop Computer** is a Unified Communications service providing telephony, conferencing and collaboration on Avaya's award-winning IP Office platform.

Improve Productivity

- Enable employees to communicate from their mobile phone, desk phone, or conference room – wherever they need to be.
- Keep employees instantly in touch with one single number.
- Get calls through quickly to the right person with powerful skills-based routing options.
- Collaborate more effectively by adding web chat, presence and audio/video spaces.

Save Time, Money and Resources

- Cloud IP Office offers simple pricing that includes basic phone service, Caller ID and voicemail right out of the box.
- Add or remove users, features or phones whenever you choose. Pay for only what your business uses.
- Simple set up – your service is implemented, maintained and hosted for you in the Avaya Cloud, saving critical time and resources for IT.
- Achieve greater financial flexibility by shifting traditional CAPEX expenses to an OPEX model.
- Reduce Total Cost of Ownership and stay current with the latest updates for the most scalable, cost-effective solution.
